## LARRY'S MAGICAL DENTURE ELIXIRS

**An amazing 20 second air drying Taubicolored™ gingival stain adventure for printed and milled PMMA dentures.**

- 5 - 10 minutes to achieve finished gingival surface. EXTRAORDINARY TIME SAVINGS! Up to and beyond 1 hour in application savings over standard light cured gingival composites.
- DURABLE! We only recommend STELLAR Glaze LC Liquid for an ultra hard and easily polished look.
- Excellent results with printing resins, incl. CARBON®, NextDent®.
- Matches Lucitone 199® denture shades in 2 - 3 coats. LT, LRP, OR, DARK. Mix for custom color.
- FAST Acting! AIR Dries faster than you can count to 20 seconds.
- Shading effects created by layering of color.
- 3 - 5 Microns per coat. Full contour printing and milling now recommended to provide added denture structure and strength.

### USES:

- Try-ins; Immediate Load PMMA Temp dentures, PMMA Bridges.
- Gingival Staining for A0, A1, A2, B1, BL3 Shades.
- 3D Printing Resins / Milled PMMA.
- Replaces costly gingival composites and time consuming procedures.
