COURSE OBJECTIVES

- Explore the types of 3D printing workflows and how they can improve your practice
- Review the principles of 3D print setup, processing, and finishing
- Understand the principles of biocompatible 3D printing usages
- Learn processes for immediate implementation of profit-building 3D printed appliances in dentistry

Dr. Josh Fowler is a dedicated digital dentist who spent the last decade maximizing and leveraging digital technologies in his practices. Dr. Fowler graduated from the University of Louisville School of Dentistry in 2007 and went directly into private practice. Realizing that the future lies in advanced technology that can be readily delegated to maximize clinical efficiency, he began his journey into those technologies. Mainstays of his practice are scanning, CAD design, in office milling, CBCT, and 3D printing. Dr. Fowler enjoys all aspects of dentistry and operates two general dental practices.
