Course Overview

WHERE

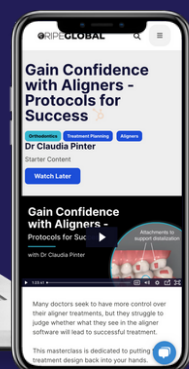

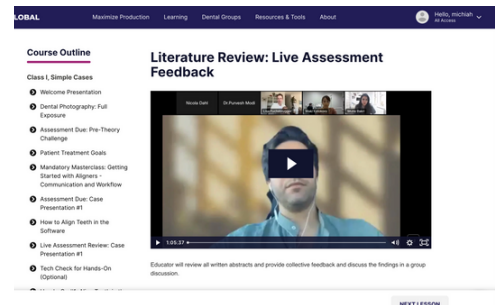

Our Fellowships go beyond 'virtual.' Receive hands-on Simulation Kits at your clinic or home, engage in live cloud-based simulations, and benefit from ongoing mentorship, all without geographical limits.

WHEN

The Fellowship in Aligner Orthodontics is a 1-year course that will see you complete all hands-on components within the first 6 months to maximize your learning and ROI. We have multiple intakes a year. Check-in with our team right here to determine our next intake.

HOW

We want to make your learning experience as smooth as possible, so we designed our exclusive platform to see you from the start to the end of your development journey.

THE PLATFORM DESIGNED FOR DENTISTS

- ✔ Central hub for resources - access your schedule, upload assessments, attend live sessions, and receive feedback.
- ✔ Use the Credit Tracker to keep all of your CPD/CE certificates in one place.
- ✔ Track your progress with our Clinician Development Tool.

Course Outcomes

FOR ORTHODONTISTS

LEARNING OUTCOMES

By the end of the course, you are expected to achieve*:

- ✔ Incorporate orthodontic principles such as anchorage and reciprocal forces into an aligner treatment plan to get predictable outcomes.
- ✔ Learn how to solve complex malocclusions such as severe crowding, open bite, deep bite, cross bite, full Class II and Class III with aligners.
- ✔ Use temporary anchorage devices to overcome aligner limitations in a full Class II or in a transverse deficient maxilla.
- ✔ Improve your patient's health beyond the oral cavity by understanding your role in the management of Sleep-Related Breathing Disorders and administering treatment accordingly.
- ✔ Excel at finishing touches by being able to do enameloplasty, gingivectomy and simple edge bonding to take a smile from an 8 to a 10-out-of-10.
- ✔ Be self-sufficient in making changes in the digital treatment plan to increase the predictability of the clinical outcome.

PERFORMANCE OUTCOMES

Upon successful application of the course material, you will:

- ✔ Fewer refinements to achieve optimal results.
- ✔ Increase production through less chair time per treatment while opening up new resources to treat more patients.
- ✔ Have effective consultation appointments, helping patients achieve better health.
- ✔ Create a unique selling proposition by offering non-surgical gummy smile treatment.
- ✔ Reduce the amount of time you need to invest in each digital treatment plan until it is ready for approval by being self-sufficient in making changes that increase predictability.

Course Outline

FOR ORTHODONTISTS

LECTURES | 13 Lectures, 13 hours total lecture time

This course uses a series of lectures curated by world-class orthodontists and dentists in the aligner sphere so you can maximize your learning and get the most out of your hands-on sessions. These lectures cover: Orthodontic Software Skills, Biomechanics, TAD's (mini-screws) and more.

PRE-THEORY CHALLENGE | 3 Challenges, 12 hours total learning

We use pre-theory challenges to get the most out of your live hands-on sessions. These challenges cover aligning the teeth in the software and orthodontic mini-screws.

HANDS-ON SIMULATION TRAINING

Three hands-on sessions in this course will have you utilize your simulation kit to replicate a procedure on the manikin. You'll receive live feedback from an educator in these training sessions.

Please see the hands-on session details below:

Hands-On #1: Align Teeth in the Software | (5 hour LIVE session)

You will be required to do a complete setup for a mild malocclusion and will be experimenting with the software to gain a better understanding of its capabilities. Exploring the options, you will discover new features and functionalities to help achieve learning objectives.

Hands-On Training #2: Mini-Screws | (5 hour LIVE session)

This Simulation Training session will focus on Inserting orthodontic mini-screws (TADs) under the guidance of an educator in various areas and learning what it feels like to "hit the roots."

Hands-On Training #3: Shape of Teeth | (5 hour LIVE session)

Take a smile from an 8 to a 10 out of 10 by polishing worn or irregular incisal edges. In this exercise you will do put composite from 1.3-2.3, roughly shape and then work out the details with a soflex disc.

FOR ORTHODONTISTS

CASE GUIDANCE OVERVIEW

Mentorship is an integral part of your learning process, which is why we have our educators give case guidance.

Every two weeks, an educator will provide feedback on cases submitted in a live session. This enables you to learn and improve your quality of work at a faster rate.

CASE PRESENTATIONS | 2 cases, 4 hours total time

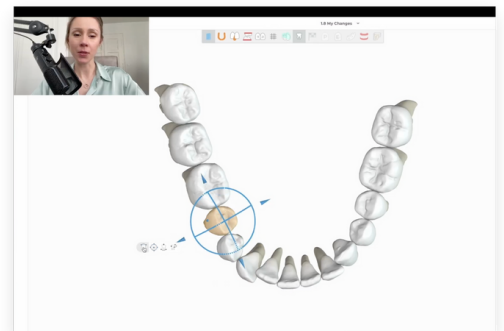

These case presentations allow you to present your treatment to one of your patients.

They will cover the following:

- Moderate Malocclusion
- Severe Malocclusion

MENTORING

From the second you start, you will have 24/7 access to a tight-knit community of like-minded dentists, including peers and educators. Here, you can ask questions, discuss issues, receive and give advice, etc. You'll get a range of educators and current and past peers of all levels responding and uplifting you.

EXPECTED OUTCOMES

After completing a residency, you can achieve the following results:

**Up to a 2x increase*
in average clinical
production**

**Up to 5 monthly
orthodontic case
starts***

**Finish cases in
half the time***

* Note: Following the successful completion of all programs in a discipline, dentists can anticipate the above increases. These indicative values are from median results based on previous RipeGlobal Fellowship graduates. Your results will vary depending on your commitment to the programs.

All our program commitment and completion requirements that are to be upheld to claim our promise:

- Complete all learning, hands-on, practice, and homework required in the program or as required by RipeGlobal mentors.
- Complete and submit all required assessments and case presentations per the program schedule.
- Engage and immerse yourself in the RipeGlobal mentoring and learning communities.
- Identify suitable patients within your clinic to participate in the patient practice you need.
- Stay up to date with any program and package dues.

A Message From Our CEO & Head of Education

We want to see dentists succeed, and we can help them achieve that success.

That's why we are making this promise to each and every one of you who enroll in a RipeGlobal course:

If you are still waiting to see the results we have listed after completing the course in full, you will be given a refund.

This is our promise to you*.

CAM HARRIS
CEO and Managing Director

LINCOLN HARRIS
Head of Education

*RipeGlobal stands behind this promise and will offer a refund of tuition (excluding enrollment fees, equipment rental, consumables, shipping costs, and transaction fees) for any course where we do not meet our promise. A refund is only considered when the learner has completed all work, without exception, and any additional extension work or practice asked of them by us.

About RipeGlobal

We want dentists to succeed - Clinically. Financially. Personally.

That's why our goal has always been to nurture dentists throughout every stage of their careers. From graduates starting their journey to experienced dentists wanting to take their careers to the next level, our platform is for you.

We have removed the isolated learning experience common to dental education and are driving the movement of collaborative, supportive environments where learning is engaging, practical, and easily implemented.

Our revolutionary cloud-based simulation training techniques give you hands-on training and practice in your home or clinic. You can significantly enhance your technical skills, not just parrot (im)practical theory.

And we do it all through our simulation kits and exclusive platform.
